CHAPTER XV

THE PROBLEM OF BRAIN DRAIN IN INDIA

Dr. Palwinder Kaur

Assistant Professor, Department of Economics, S.D. College, Hoshiarpur, Punjab, India

Abstract

Brain drain from India is at rise and is a cause of concern for the country. Over the years, millions of young talented Indians from various disciplines have left the country in search of better opportunities. For long time, the idea of people moving to a different country was seen as a badge of honour, a feather in the cap as it were. The most singularly pursued dream. And this was primarily because India was unable to offer those prospects to its citizens. It is not that India is adequately able to, right now as well. There may be several reasons of brain drain. Studies have found that 23,000 Indian millionaires have left India since 2014 and that nearly 7,000 millionaires left in 2019 alone, costing the country billions in tax revenue. Since 2015, nearly 9 Lakh Indians have given up their citizenship. 'Non-residential' Indians are becoming 'not-returning' Indians, and even the 'reverse brain drain' has stopped. So is India's brain drain problem getting worse? The present paper is an endeavour to assess the problem of brain drain in India.

Keywords: Brain Drain, Overseas Education, Professionals, Technocrats.

Introduction

Brain Drain is actually the shifting of highly skilled and qualified people to a country where they can enjoy a better work culture and earn more. It can also be named as 'human capital flight' because it is similar to the case of capital flight, in which mass migration of financial capital is involved. India's Diaspora is a geographically diversified Diaspora, which is spread in as many as 110 countries. The Government of India estimated that there are 30 million Indian Diaspora spread across the world. The Indian human resources who are working for the developed countries are highly skilled. We are losing valuable human capital with our valuable money which is collected from the tax payers. The tragedy is we are sending our skilled human resource for the development of developed countries becoming a major supplier of human capital for the advanced economies. India is sending lakhs of these specialists compared to other important origin countries. Brain drain is the cur
