ABSTRACT

You can't deny the role of Teacher in anyone's life. during a country like India Teacher was worshiped like GOD but in present scenario, Society is improving rapidly with the method of westernization. it's another impact of modernization. Now the role of teacher is modified for the sake of higher adjustment and understanding and that they forced to perform several duties beside the normal activities. Present education system is predicated on child centric and the teacher has paid his full attention towards the demand of his students. The teacher should arrange a democratic classroom environment where they will share their knowledge freely to construct new knowledge. Teacher must be involved in taking a positive role in school room management also as school management. This is the necessity of the hour that teacher should adapt and change himself within the changing scenario to perform his duty successfully and take the responsibility of his students for his or her better future.

Keywords: teachers, present scenario, better adjustment, school management

Introduction

consistent with the UN, "Education may be a process which pulls out the simplest in man with the aim of manufacturing a well-balanced personality". So, education played a really significant role in developing the general personality of a private to the extent of perfection and outcome the simplest citizen from him. within the opinion of Dr. A. P. J. Abdul Kalam, the previous president of India, "the whole purpose of education during a country is to develop and enhance the potential of human resource and progressively transform it into a knowledge society". For this purpose of education, teacher features a very significant role. In our Indian Society, the prime purpose of education was to transmit the knowledge to subsequent generation and teach them the facts, and standards of ethical and social conduct which they concede to be necessary for subsequent generation's material and social success. during this way the role of teacher was as important that he was worshiped like GOD. His role is taken into account as a giver of data, which he gives to students on a specific subject.
